Psychological Assessment of Dyslexia
This book presents first-hand accounts of what dyslexia means for children themselves, and for the people around them.

Newly updated, Gavin Reid's best-selling handbook remains an essential resource for those helping dyslexic individuals of all ages, from preschoolers to adults in the workplace. Combines theoretical explanations, the latest research, and practical solutions with a focus on inclusion and meeting the individual's needs. New and expanded coverage includes: multilingualism; the use of technology; co-existing conditions such as dyspraxia, dyscalculia, and ADHD; and positive dyslexia. Assembles the latest policies and best practices for dyslexia from around the world, and makes current debates regarding education and literacy accessible to trainees and practitioners.

Recording for the Blind & Dyslexic, Catalog of Books

Teaching Children with Dyslexia is essential reading for any teacher, Special Educational Needs Coordinator or teaching assistant who wants an insider's account of what dealing successfully with dyslexia entails. Written by one of the most well-regarded practitioners in the field with over twenty-five years' experience, this book is packed full with photocopiable exercises, activities and recommendations for resources, tests, teaching methods, advice and suggestions for strategies and techniques that are instantly transferable to classroom environments. This essential teaching companion includes chapters on: how to spot dyslexia screening and assessment tests why it does not have to be hell to learn to spell strategies for success for reluctant writers meeting the challenge of dyslexia in adolescence. Written specifically to bolster teachers' confidence and empower them with the key to unlocking literacy problems in their most challenging pupils, this resource book should be on the shelf of every staff room.

Hearings before a Subcommittee of the Committee on Appropriations House of Representatives -- 100th Congress, 2nd Session, Part 4A (Department of Labor, Health and Human Services, Education, and Related Agencies Appropriations for 1989)

This resource offers a convenient way to locate practice guidelines in practically any clinical area. This edition provides a comprehensive bibliographic listing of more than 1,900 guidelines, standards, and
other practice management strategies -- including several hundred new guidelines -- indexed by subject, title, and sponsoring organization. Each entry provides pricing and order information. Also included is a mid-year update with newly developed practice guidelines, those under development, and those recently withdrawn.

**American Book Publishing Record**

"This book brings together a number of experts in the area of assessment for special educational needs, who collectively provide a range of perspectives on the many contemporary issues surrounding formal statutory assessment under the 1981 Education Act, and school-based assessment. It examines critically the appropriateness of current methods of assessing children's special educational needs, and discusses the relationships and tensions between assessment, provision and resourcing, as well as the fundamental and underlying principles of equal opportunities and entitlement. "The book will be of particular interest and practical value to teachers and educational psychologists working in special educational needs settings; but will also be of value to governors, since assessment of children's progress generally has become such a public and even controversial issue."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. **The Development of Dyslexia and other SpLDs**

Development of Dyslexia and Other SpLDs is about the persistence of dyslexia and specific learning difficulties (SpLD) into adulthood. It pulls together experiences of many dyslexic/SpLD people. The book is written with non-linear readers in mind: those who need to move about a book picking up ideas that are currently relevant to them; a style that suits many dyslexic/SpLD readers. The book gives a framework for understanding the wide-ranging experiences of dyslexic/SpLD adults. With the greater understanding, there should be better help for: • adults who still have no strategies for dealing with dyslexic/SpLD problems • children who have some skills but not at the level of their overall intelligence • young children who
show the first signs of difficulties • dyslexic/SpLD children in mainstream schools. A new paradigm is proposed whereby all teaching programmes utilise each learner’s learning strengths - catering for dyslexic and SpLD adults and children involves vital teaching and learning approaches that are good practice for all.
